

PARTS LIST

“DELUXE MODEL” AND SIDECARS

Excelsior Motor Mfg. and Supply Co.
3701 Cortland Street
CHICAGO ILLINOIS

NOTICE

Several pieces of equipment for the Henderson, such as the magneto, generator, battery, etc., are made by manufacturers other than ourselves. The manufacturers of these parts are anxious that all users shall obtain satisfactory service and will welcome a chance to help you in case you should experience any trouble with their products. Some of these pieces of equipment require complicated and highly specialized manufacturing process, so that service can best be given by the manufacturers themselves. For service, repairs, adjustments, parts or information pertaining to any of these pieces of equipment, please communicate direct with the manufacturers whose names are given below:

MAGNETO	SIMMS MAGNETO CO., East Orange, N. J.
GENERATOR	SPLITDORF ELECTRICAL CO., 392 High St., Newark, N. J.
BATTERY	WICO ELECTRIC CO., Springfield, Mass.
CARBURETOR	ZENITH-DETROIT CORPORATION, Foot of Hart Ave., Detroit, Mich
HORN	REMY ELECTRICAL DIVISION, General Motors Co., Klaxon Branch, Newark, N. J.
HEADLAMP	C. M. HALL LAMP CO., Kenosha, Wis.
AMMETER	WESTON ELECTRICAL INSTRUMENT CO., Waverly Park, Newark, N. J.
TAIL LAMP	CORCORAN-VICTOR CO., Cincinnati, Ohio

EXPLANATORY

FRAME

When ordering a frame, be sure to state whether the new low frame or the old high frame is required. The gasoline tank and other parts of the new low frame model WILL NOT FIT the old high frame model.

REAR MUD GUARDS, GASO- LINE TANKS BATTERYBOXES REAR STANDS CHAIN GUARDS

All of these parts of the new low frame model will not fit the old high frame model. Therefore, when ordering any of these parts you can prevent mistakes by stating whether they are wanted for the new low frame or old high frame models.

HIGH LIFT CAMSHAFT

To install the new high lift camshaft in the old models it is necessary to make some alterations to the crankcase as shown on Service Bulletin No. 7. Also, the new style tappets and guides must be used, or the old ones must be altered in accordance with the Service Bulletin.

NEW GEAR SHIFTER LEVER AND SHIFTER SHAFT

In the latest gear shifting mechanism, the shifter lever slides on a stationary shaft and is held in the different shift positions by means of a new spring and ball lock. All adjustments are made from the outside of the transmission case. To install these new shifter parts some crankcase alterations are necessary which are shown on Service Bulletin No. 8.

BAFFLE PLATES

The latest baffle plates which baffle the cylinder openings as well as the tappets, are shown on Service Bulletin No. 2 which gives instructions for installation in old models.

CLUTCH RELEASE SHAFT

The clutch release shaft has been strengthened by increasing the diameter from 9/16" to 19/32". To install the latest shaft it will be necessary to drill or ream the clutch release fork to take the new 19/32" shaft and to enlarge the hole in the crankcase for the end of the shaft accordingly.

ENGINE SPROCKETS

The new Hendersons are equipped with engine sprockets having a single keyway for a special No. 9 Woodruff key. Sprockets for the old models had four keyways for No. 6 keys. When ordering engine sprockets or spline shafts be sure to specify whether they are wanted with ONE or FOUR keyways.

TIMKEN HUBS

Many of the parts for front and rear Timken hubs are interchangeable, as you will notice from the parts list. Timken bearings can be installed in old model ball bearing rear hubs by means of our Timken Conversion Set, in which a pair of special adapter cups are used in the ends of the old hub replacing the old ball cups. For the front, it is necessary to build up a new wheel using one of the new Henderson Timken Hubs. **BE SURE TO PLACE FRONT WHEEL IN THE FRAME WITH THE ADJUSTING CONE ON THE LEFT SIDE. THIS ADJUSTING CONE HAS A RIGHT HAND THREAD AND WHEN PLACED ON THE LEFT SIDE OF THE FORK IF IT SHOULD EVER WORK LOOSE, REVOLUTION OF THE WHEEL WILL NOT TIGHTEN UP AND PINCH THE BEARINGS.**

VALVOLINE OIL

A great proportion of the motor troubles are caused by inferior oil. We have been using and recommending Valvoline Oil for several years. We know that riders and dealers who use Valvoline Oil will have an absolute minimum amount of motor trouble. For your own protection insist upon Valvoline Oil which can be purchased from the Valvoline Oil Co., 89 Broadway, New York City, or 105 North Clinton St., Chicago, or from any of their branches.

UNLESS YOU HAVE AN AC- COUNT WITH US

Unless you have been buying parts from us and have an established account, enclose money order or stamps to cover parts and transportation. We cannot open small accounts with individuals, so cash with your order is necessary. Unless you do send a remittance with your order, shipment will be delayed.

ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE

Henderson "DeLuxe Model" Parts List

Superseding All Previous Lists

073042

To prevent mistakes and to avoid delay in parts shipments always specify the number of your motor and the model of your machine. Also give the photo number and parts number as well as the names of the parts as listed in this catalog. This will enable our Parts Department to fill your orders accurately and promptly.

Remember, if you do not tell us just what you require and give us the parts numbers we have no way of knowing what you need.

Orders for parts except from our regular dealers must always be accompanied by money orders or stamps for full payment. We cannot open accounts for small amounts with individual owners so cash with order is necessary. Be sure to include money for transportation charges on the parts you are ordering.

If you desire to write about some other matter when ordering parts, fill out your parts order on a separate sheet from the letter. In other words, do not order parts on the same sheet of paper on which you are writing your letter. This will enable us to give better attention to the parts order and to your letter. Be sure to put your name, address and full shipping instructions on all orders.

Remember that by making your orders clear and easy to understand you will enable us to take care of your requirements quickly and correctly. If we do not understand what you want, we may ship you the wrong parts or we may have to hold up your order and write to you for further information. For instance, if you wanted to order an oil filler extension, this should be specified: **One No. 62 - K1116 Oil Filler Extension for 1923 Henderson Motor, No. 9573.**

A telegraphic code consisting of five letters words is given for economizing when ordering parts by wire. When telegraphing rush orders, be extremely careful to use the correct code words for the parts desired. Thus, to order an oil filler extension for a Henderson DeLuxe model, simply wire us "**One WODDA**" which is the code word for this part.

When returning parts to us for repairs or replacement a letter should be sent to us at the same time giving full information and detailed instructions as to what is desired. Be sure that the parts are plainly tagged with your name and address and that transportation charges are prepaid.

When ordering parts place yourselves in our position for the moment. Read over your order and consider whether or not you would understand just what was wanted if you were filling orders in our Parts Department.

Prices are subject to change without notice.
